The motive for investment from German-speaking countries in Slovakia continues to be the price and the qualification of the labour force, said the partner of bnt-Sovova Chudáčková & Partner Zuzana Chudáčková office. As she added our advantage compared to our neighbouring countries is also the tax system and transparent process for the transfer of property that is no longer encumbered with taxes from this title.

The demand for legal services in the major real estate projects and project financing reduced significantly this year according to Chudáčková. Since the end of 2008 increased the interest in the current business consultancy focused on the employment area, cost savings, insolvency and the restructuring of companies that want to protect themselves against the decline of trading partners and its own. „Compared to last years we have seen increased interest in the enforcement of claims,“ said Chudáčková.

Potential investors started to seek the support of science, research and intellectual property. Compared to last year when they oriented to export production areas, respectively properties, the office found the interest in obtaining, respectively strengthening the position in the domestic market.
