The investors in the South industrial zone in Dolné Krškany, Nitra, already have building permits for engineering networks, roads and extension of the road I/64. These building permits were provided by the city's subsidiary - Nitrianska investičná, s.r.o., which deals with the preparation of this zone for businessmen. It wants to construct the infrastructure using state money; an application for a subsidy of about EUR 11 million has been submitted to the Ministry of Economy. The zone has two parts - one intended for domestic small and medium-sized enterprises, the other for higher value-added investments. 12 domestic companies focusing on light machinery will occupy an area of about 4 hectares. In the second stage, the German company Mühlbauer Technologies, s.r.o. will build its scientific and technological centre.
