Treinvest Company plans to build a new commercial complex at the price of about 16 mills Euro in a western part of Poprad. It would create 130 new jobs. The commercial complex would be spread on the area of 46.5 thousand m² and provide more than 18 thousand m² of utility space. It will serve for the sale of certain types of non-food consumer goods and for fast food service shops. The investor wants to start construction already this year; its completion is planned for October 2011. A part of the complex will be the commercial centre Azor, which will focus on the sale of household appliances, audio-video technology and furniture and floor coverings.
