

# The state has sold bonds for 461 million Euro

Author: SITA - Slovak News Agency | Published: 01.09.2009

On Wednesday was a big interest in four-year bonds of 211 series at the auction of the Agency for Debt and Liquidity Management. This is confirmed by the results of the Agency when from the total demand of 793.5 million Euro it accepted offers of investors on the level up of 461 million Euro. This is by far the highest amount accepted within a single auction during this year. According to the Head of the Department for Debt Management of the Agency Tomáš Kapusta this interest of investors surprised. „We did not expect such an interest. What is gratifying, it was also from abroad, what was not up to such usual phenomenon in the first half of the year,“ he told for SITA. The Agency for Debt and Liquidity Management was selling state bonds in the domestic market 15-times this year besides the last auction. In these auctions it achieved the total demand of 5.992 billion Euro of which 2.398 billion Euro were accepted.
