

# ČS has significantly reduced realty loans

Author: SF / pb | Published: 08.09.2009

“Statistically, mortgage loans for construction to business entities are reported and among them there are developers loans. We provided such loans this year in an amount of 2 billion crowns during the first six months compared to 7 billion during the same period last year. Although it is a large decrease but also a proof that we continue lending money,” said to SF Kamil Kosman, the Director of the Division of Realty Funding and Mortgages of Česká spořitelna. More about present events in ČS, as well as in Erste Bank is in the interview with K. Kosman on the portal [www.stavebni-forum.cz](http://www.stavebni-forum.cz).
