

Finalization of the petition against the closure of the complex Prešovská

Author: SITA - Slovak News Agency | Published: 15.09.2009

Inhabitants of Ružinov ended the petition against the planned construction of the administrative-residential complex Prešovská, which wants HOC Company to build here among residential buildings. Its component is to be the 14-storey administrative building and 15-storey residential building. Dissatisfied citizens require rejecting the construction permission, which would be a further thickening of the territory according to their opinion. Within less than a week they collected over 300 signatures; the exact number will be communicated upon receipt of all sheets.
