

# Construction in Slovakia dropped by 2.4 percent in July in the semi-month comparison

Author: SITA - Slovak News Agency | Published: 22.09.2009

Seasonally adjusted construction output in SR dropped by 2.4 percent in July in the semi-month comparison, while in the semi-year comparison decreased by 5.2 percent. The European Union's statistical office Eurostat informed about it. Slovak Republic has placed together with Portugal to fourth place in the semi-year comparison. Of the twelve countries that have supplied data, seven recorded more decline in output than Slovakia.
