

Banská Bystrica: Real estate database will help investment

Author: SITA / jup | Published: 17.08.2010

Investors interested in investing in the territory of Banská Bystrica self-governing region (BBSR) can choose the property for sale or rent on the web portal bbsk-invest.sk, which is operated by the regional government in Slovak and English. The database currently contains over 140 properties including 15 industrial parks. Investors can search by various criteria - district, town, type of property and whether it is for sale or rent. As Vladimír Laššák - head of regional development at the BBSR office - said, an enormous increase in demand was recorded since launching the portal in October 2009 - there are currently 2-3 offers monthly. The portal is aimed at presenting investment opportunities in BBSR. Greenfields as well as browfields and commercial premises with an area of at least 500 m² and industrial buildings and cultural monuments suitable for commercial purposes with an area of at least 250 m² can all be included.
