

# AFI Europe has started second construction phase of Classic 7

Author: SF/pb | Published: 01.11.2011

The company AFI Europe has launched second phase of construction of the office project Classic 7 Business Park in Prague's suburb of Holešovice. The new building will offer over 11,000 "squares", its completion is scheduled for 3rd quarter of 2012. The project's general contractor is IMOS Brno. Similarly to its first phase, CMC architects studio is behind architectural design of the project. The second phase will build on the success of the project's first phase - a reconstruction of two buildings of the former Holešovice steam mill, whose history dates back to 1911. After completion of the second phase, there will be a complex of four buildings with an internal atrium with relaxation zones for tenants.
