Stanislav Orovnický Company-Vodostav from Zlaté Moravce will build-up the canalisation for Pastovce village at the Levice region at the price of 1.417 millions Euro. The agreement for the canalisation building-up between the public procurer and the tender winner was closed on February 20, 2009. The subject matter of the order is building works while building the system of sanitary sewerage, mainly the make-up of the gravitation canalisation, the discharge pipe, the re-pumping station and the building-up of cable connection to the pumping station and the branch drains as well. The canalisation network ought to start be built-up in April 2009 according to the tender conditions, announced on September 26, 2008, and finalized at the end of March 2012. The building object is planned be financed from credit sources, from the Environmental Fund subsidy and from non-recurring financial means of EU.
