Further wind power plant will maybe grow in Slovakia. SWP Company plans to build the wind park Pribeta with 22 to 32 wind power plants. The company intends to invest in the park construction from 78 to 114 million Euro. With the construction it wants to start in March 2010, its completion is scheduled for August of that year. The installed capacity of the wind park should be from 44 to 88 megawatts (MW). It would supply from 90 thousand to 160 thousand megawatt-hours of electricity per year for the electricity transmission system.
